

Parking lot USB exercise

Contents	Write 2-3 sentences about the types of information found on this device. • <i>There are files containing PII including work related persons and personal acquaintances.</i> • <i>There are sensitive work files that contain employee budget information and shift schedules.</i> • <i>Personal files and work files should be stored separately in all cases.</i> • <i>Both personal and work related PII are found on this drive.</i>
Attacker mindset	Write 2-3 sentences about how this information could be used against Jorge or the hospital. • <i>There is employee budget information which is financial that could be directly used against employees.</i> • <i>There are vacation photos and wedding plans that can be used for reconnaissance by a threat actor.</i> • <i>Someone could impersonate Jorge and manipulate the business practices of the hospital.</i> • <i>It could be used to target specific individuals of the hospitals with the knowledge of their personal information. Such as a phishing email based on social engineering.</i> • <i>Malware, ransomware, and trojans could be some of the malicious content embedded in this drive. If the device were infected, it could spread to the network or gather information such as SPII.</i>
Risk analysis	Write 3 or 4 sentences describing technical, operational, or managerial controls that could mitigate these types of attacks: <i>Security awareness training regarding this type of attack should be implemented, as well as awareness of social engineering. All end points on the network should have auto-read disabled when USB drives are inserted to prevent malicious injection of malware. Routine vulnerability scans and software updates should be performed if not implemented already.</i>
